

Join us for a cohosted event:
**Single Cell Sequencing with
 10x Genomics and PacBio**

Tuesday June 13th, 2023

11:00 am to 12:00 pm ET

Contact the EIGC

(eigc@emory.edu) for more details

Join us in person or online:

Emory University - HSRB auditorium

Join via Zoom [HERE](#)

About:

Come learn about how PacBio's highly-accurate long-read (HiFi) sequencing and 10x Genomics Chromium Single Cell platform technology are enabling cancer research!

- The PacBio talk will cover: MAS-Seq for 10x Genomics single cell libraries, a kit to detect novel isoforms, fusion events, splicing events, and more; Targeted sequencing in pharmacogenomics; Sequencing By Binding for liquid biopsy
- 10x Genomics tools for maximizing RNA isoform detection and usable long NGS reads

**Emory Integrated
Genomics Core**

Emory Integrated Core Facilities

PacBio

10x GENOMICS

The speakers:

Inna Dzekunova

Sequencing
Application Specialist

PacBio

Bradley Toms MSc.

Science and
Technology Advisor

10x Genomics
