10x GENOMICS

GEM-X Flex Apex Sample Prep Seminar

Hosted by EIGC, EICC, & 10x Genomics

Join experts from the **Emory Integrated Genomics Core** (EIGC), and the **Emory Integrated Computational Core** (EICC), and **10x Genomics**, for an interactive technical seminar. Learn how to optimize your sample prep, navigate workflow requirements, and leverage core services to ensure high-quality single-cell data for your upcoming studies.

This webinar will cover the following key topics:

- **Flex Apex Assay Overview:** Chemistry, workflow overview, sample compatibility & multiplexing options
- **Sample Prep Best Practices:** Input requirements, 10x-supported protocols & sample QC recommendations
- **EIGC Wet-Lab Services:** Sample hand-off requirements, required QC, library prep & sequencing options
- **EICC Analysis Services:** Data analysis offerings, storage & data transfer options

Date: Wednesday, September 2, 2026

Time: 11:00 AM - 1:00 PM ET

Location: HSRBII, Room #N100

Register: <https://forms.gle/6kRoRzU5JPfxA2n49>

Stick around for Project Office Hours (1:00 PM – 3:00 PM)

Planning an upcoming Flex project? Stick around immediately following the seminar for experimental design guidance from 10x & core experts.
