31 OCTOBER

When: 10:00-11:00am

Where: HSRBII Building, Room N100

1750 Haygood Drive, Atlanta, GA 30322

A Deep Dive into Digital PCR

Abstract: This presentation will give an overview of Digital PCR (dPCR) and the unique advantages of Qiagen's QIAcuity dPCR System. We will learn about how dPCR can impact your research and how to transition from qPCR. A short list of potential applications include gene expression analysis, copy number variation, biomarker profiling and mutation detection quantitation.

Speaker bio: Danielle Kobi brings 15 years of translational research experience with QIAGEN. Driven by a passion for turning the seemingly impossible into reality, fostering collaborative relationships, crafting tailored workflow solutions for her customers, paves the way for future success. .
