

Vestigo[®]

The Industry Standard in Investigational
Drug Service Automation

Safety. Efficiency. Compliance.

A leader for nearly two decades, Vestigo has transformed Investigational Drug Service (IDS) by automating manual processes associated with IDS management and operations. Through automation, Vestigo increases safety, efficiency, compliance and accountability.

Automate your IDS with Vestigo.

Research pharmacists nationwide have chosen to work with the McCreadie Group to automate the manual tasks associated with Investigational Drug operations using Vestigo.

- 80% of top 10 NIH funded Research Institutions
- 50% of NCI Designated Cancer Centers
- 55% of Clinical & Translational Science Award Programs
- Nationally recognized by drug sponsor monitors and auditors
- Research pharmacies and oncology research clinics large and small have adopted Vestigo
- Vestigo serves multi-facility institutions and non-traditional research sites

The Results Prove It's Worth the Investment.

- Vestigo delivers 15-25% gains in efficiency over manual operations resulting in lower operational costs
- Technicians and Pharmacists experience a 90% reduction in manual inputs for billing per month
- 8% gain in Revenue due to on-time billing and unmissed charges
- A minimum return of 2x and up to as much as 11x on the cost of investment*
- Pharmacists are able to devote more time to their most valuable work and less time on manual processes and paperwork

**As reported by clients and varies by size of research hospital.*

Transforming IDS with Vestigo.

- **Automated protocol management** handling the most complex protocols in a logical and safe manner
- **Automated inventory management** including lot number tracking, patient-specific inventory tracking, patient returns and destructions
- **Integrated dispensing and automatic labeling** limited to patients enrolled in the current protocol
- **Fully automated billing management** increasing revenue and reducing the cost of generating bills
- **Electronic drug accountability reporting** which are complete, accurate, legible, HIPAA and 21 CFR Part-11 compliant
- **Competency management** documenting in-services and competencies completed
- **Scheduling features** include the ability to track appointments and monitor visits with a calendar
- **Chain of Custody** documenting the movement of dispenses through the pharmacy
- **Access code repository** to retrieve sponsor codes
- **Temperature excursion documentation and tracking**
- **Monitor Access Management** allowing read-only access for authorized protocols using Vestigo Verify™
- **Extensive reporting**

“At Emory University, we purchased Vestigo in 2007. In early 2008, the University began to require that all drug studies be managed by the Investigational Drug Service. We quickly grew from 120 protocols to 250 in the first two years. We could not have handled the growth without Vestigo, and our number of protocols has continued to increase to over 400 today. Our operation could not function without it.”

Susan Rogers

RPh, Director, Investigational Drug Service, Emory University

The Industry Standard for IDS Management.

- Increase accuracy and safety with a series of checks and balances to ensure the correct investigational drug reaches the right patient and greatly reduces the likelihood of errors
- Create electronic Drug Accountability Records that are complete, accurate and legible facilitating compliance with study regulations
- Generate efficiency and standardization while enhancing staff satisfaction
- Secure web-based application
- Allow research pharmacies to grant temporary and restricted read-only access to monitors for the purpose of reviewing and authorizing information using Vestigo Verify™
- Interface with common CTMS and EMR systems, and integrates with carousels in real-time for seamless communication transfer

Vestigo is the Central Hub Interacting and Interfacing with IDS Systems

Unparalleled Customer Service & Subject Matter Expertise.

The team has dedicated their careers to staying ahead of industry trends, ensuring Vestigo can anticipate and meet evolving IDS needs. When you call our support line you will speak with a subject matter expert. We will provide you with unparalleled customer support and service, on-site implementation, continuous training and optimization visits when needed.

Implementation:

On-site training and implementing can occur as quickly as 6-weeks after a contract has been signed. We use existing electronic content from your IDS to aid in the protocol build within Vestigo. Thus allowing you to start using the system right away.

“I was the IDS team lead at another site, and was involved with the implementation of Vestigo. Six months after switching to Vestigo, every person on the team said the same thing “How did we ever manage without it?” I have since moved over to Tampa General, and discussed the need for Vestigo, and that is was essential for any IDS to function efficiently. We have now implemented it and all is running smoothly.”

J. Michael Hayes

*PharmD, CPh, Pharmacotherapy Specialist,
Investigational Drug Service, Tampa General Hospital*
